

Hello dear Oleg,

How are you? And how are things at the land?

Me and my friends felt like home , at last year's SUN , and we are thinking to come back , enjoy the music and landscape, share our work and be reunited with the amazing people we met last year.

Are you interested in another hammock area? Because if you are , we have a few ideas for this year gathering.

We would like to create a place to chill and relax, like the hammock area we had last year in the Hidden Island, very colorfull and full of surprises and interaction.

So I propose to make for you a hammock area to keep. Something that we can make and will stay forever in the SUN colors and settings. Last year we went to 7 festivals and learned a lot about what people want and how to make a great reliable hammock area. So we propose to you a hammock area of a duzin (12 pieces) hammocks and some other decorations for the **Garden of Eden**. We will arrive 2 days earlier to decorate the area.

In the mornings we will have a Meditation workshops, and in the evenings we will make body painting with UV paint, from the second day of the festival, until the last day of the festival.

You will get to keep all the hammock area and the decorations and all the electrical equipment (for night decorations like UV) we will use in the setting.

Of course we will need electricity, so we can keep the area colourfull at night too.

This is our inspiration for decorations:

A place full of dreamcatchers, for a lasting use, we will use wire for the circle. The hanging dreamcatchers will be colorfull, embelished with wooden beads, and feathers.

Flower made out of reuse of plastic pet bottles. Placed on the trees, and on the ground , to create waves of colorfull flowers, easy to store and carry. At night time there will be light on them, so we can avoid people to step on them.

We will make strig art frames, to decorate the area, also UV glowing string art between the trees.

Lamps made of recycled materials and christmas lights.

We will decorate the area with mushroom like this, as we did last year.

We will also have a little shop, where we can share our creations.

So if you are interested we can talk about the budget we have in mind, and also what we can provide for the money you will give us. We wish to create a unique colorful and senzorial experience in the chill hammock area that you can use in the years to come.

And the budget we thought would be 1900 euro for the complete offer, including all the above and more.... if you agree we will make a visit for a talk and concept planing, also to take pictures and see the place once more.

- 12 pieces of XXL hammocks, handpainted and sewed, from natural thick and durable material. size 3,5m X 1,6m
- Lycra shaders over each hammock and also some for decorating the area.
- Decorations for the Garden of Eden (examples and description above)
- Lighting systems and UV for night time (the colour changing lights we had last year were very nice and we intend to use, in combination with light objects on forest floor, and on tree branches - rain resistant).

Or a smaller budget, of 1600 euro, that excludes lighting systems and UV for night time.

The money will be used for buying supplies for the decorations. We are voluntering to create the decorations and design the area.

We really wish to make something special for SUN and dedicate all our attention into making it. Hope to hear from you soon, and hope we can create togheter. :)

Please contact us soon, if you are interested, so we can finish everything on time. We will need about 2 months to create the decorations and the hammocks.

We wish you a sunny week

Ami & friends
